

DRCC sets up two additional task forces

The Deafness-Related Concerns Council is pleased to announce the establishment of two additional task forces which will work on orientation and interpreting needs.

The Task Force on Orientation will analyze existing programs introducing newcomers to Gallaudet and come up with recommendations for the best possible introduction for newcomers, particularly on the meaning of deafness. Members of this task force are Annette Baker, Malcolm Grossinger, Gerilee Gustason, Steve Kallan, Barbara Kannapell, Rex Lowman, Bette Martin and Carolyn Williamson, with Ausma Smits as the DRCC contact.

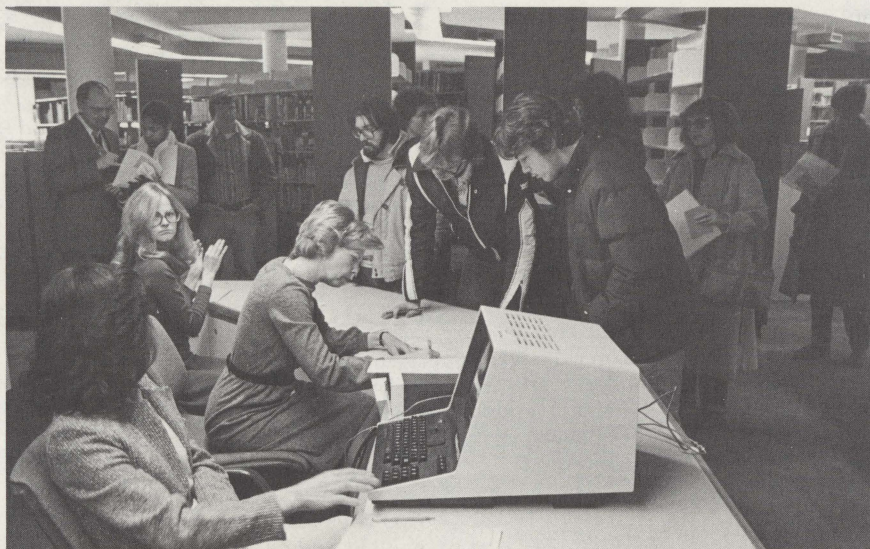

The Task Force on Interpreting will consider all angles of interpreting on this campus: the needs of the classroom instructor, the deaf consumer, the interpreter services provider, the secretary-interpreter. Serving on this task force are Yerker Andersson, Kathy Burton, Al Couthen, Sheila Grenell, Joyce Groode, Mike Kemp and Mary Anne Royster, with Nathalie Couthen as the DRCC contact.

Anyone with questions, ideas, material or other things relating to either of these issues is urged to contact any of the individuals serving on the relevant task force. Input of all kinds is desired by both groups.

During its December meeting, the DRCC also:

- Received a preliminary report from its Task Force on Deaf Employment dealing with the first phase of its work, the overall statistical picture of the current employment situation of deaf faculty and staff at Gallaudet.
- Received a number of letters which were referred to the appropriate task forces for study, such as a situation where a workshop was held without interpreters per se, and where fluent individuals neglected to sign for themselves.
- Completed a questionnaire for staff circulation which should reveal the desirability/feasibility of giving special recognition to those who achieve a high level of competence in manual/visual communication skills, and the form such recognition should take.
- Decided to hold the next three meetings on these dates: Monday, Jan. 19, Tuesday, Feb. 10 and Monday, March 9.

As usual, anyone wishing to meet with the DRCC for whatever reason is welcome to do so between 12:30 and 1:30 p.m. on the meeting days. It is expected that the first two meetings will be held at the MSSD Penthouse. Check the location with any DRCC member.

Students registered for this semester's classes in the newly-opened Learning Center on Jan. 8.

Honors Program begins next fall

The Gallaudet College Honors Program is now admitting its first students for courses beginning in the fall of 1981.

The new Honors Program, mandated by the undergraduate faculty in February, 1979, will provide an enriched and challenging curriculum for academically talented Gallaudet students. During its first year of operation, it will focus on courses meeting the general education requirements for the BA and BS degrees. It is hoped that offerings will be expanded as needs of Honors students are more clearly identified.

Students admitted to the Honors Program will be those who demonstrate both the motivation and the capability to perform at a high level of academic achievement. Criteria include recommendations from faculty, grade point average of 3.2 or better except in the most unusual circumstances and satisfactory performance on an admission examination designed to measure

comprehension, analysis and writing ability. Those admitted directly from secondary school programs will be judged on recommendations from their schools and teachers, scores on standardized tests and on performance on the program's admission test administered during orientation.

Once a student has been admitted to the program, he or she has the option of working toward a BS or BA degree "with college honors" by completing a total of 42 credit hours of Honors work with a grade of B or better—including a senior honors thesis—or simply taking one or more Honors courses for personal enrichment.

In addition to the general College Honors Program, departments of instruction at Gallaudet now have the option of establishing criteria for honors in the major. The Department of Psychology has already established a departmental honors program, which will also begin in the fall of 1981, and a number

continued on page 3

College Council nominees picked

Sixteen people have accepted nominations for seven staff representative positions on the College Council following nominations by division which were held Jan. 12. The election to select the nine staff representatives will be held Jan. 29.

The two top nominees for each seat who agreed to serve if elected were chosen to run, except for the two positions in the Division of Academic Affairs, where nominees tied and three people will be running for each seat.

Due to some confusion with the balloting process, nominees for the two pre-college positions are being chosen today.

Nominees chosen to run for election are, by division:

Academic Affairs: Lloyd Green, Sharin Manion and Natalie Powell (exempt); and Sharon Hayes, Diana Lamberon and Agnes Muse (non-exempt).

Business Affairs: Suzanne Baker and Holly Hargis (exempt); and JoAnn Demirkan and Charles Jones (non-exempt).

President's Office: Patricia Foddrell and Vickie Walter.

Public Services: Patricia Hunter and Gina Oliva.

Research: Kathy Berault and Kathy Burton.

Photographs and more information on candidates will appear in the next issue.

NFI gets grant for sign films

The National Film Institute has recently received a major grant of \$167,000 from the U.S. Department of Education to produce a series of films to teach sign language to hearing people.

The series is being developed in cooperation with the National Association of the Deaf and Lottie Riekehof, chairperson of the Department of Sign Communication at Gallaudet. The films will be modeled after the "Muppet Show," lively and entertaining to appeal to all ages. NFI is exploring the possibility of getting Tommy Smothers as host for the series, which will also feature the National Theatre of the Deaf.

The purpose of the series will be to teach 300 basic signs to hearing people to facilitate communication between hearing and hearing impaired people. The programs will be particularly geared to parents of deaf children, 90% of whom are hearing persons who have no previous experience with deafness.

Among Ourselves

E. Ronald Dreher, associate professor and chairperson of the Department of Physical Education and Athletics, presented a paper entitled, "Holistic Health: A Symbiotic Relationship with Community Education" Dec. 3 at the National Community Education Association meeting in Denver, CO. Dreher also conducted a workshop on "Project: Community Gain," which focused on ways to impact local communities in the areas of holistic health, recreation and community education.

The Law Center's Program Coordinator, Nancy Abbott, gave a training session Dec. 15 to student officers of the Prince George's County Police Department dealing with "Communicating with the Deaf." Abbott was assisted by NCLD's Elaine Gardner, who spoke on legal responsibilities of the Police Department.

Roslyn Rosen, director of the Special School of the Future, received her EdD from Catholic University of America on Dec. 1. She is the first deaf woman to receive her doctorate in Educational Administration. The topic of Rosen's dissertation was "Recommendations on Educational Placement and Special Services for Hearing Impaired Children" by four types of administrators. Ray Trybus, dean of the Research Institute, served on the committee.

Richard Phillips, chairman of the Department of Counseling, will be looking into student personnel programs and the need for services for aging deaf people while on his sabbatical. While Phillips is on sabbatical, William McCrone will assume the duties of acting chairman of the Department.

GCRC helps children see play

The Gallaudet Community Relations Council enabled five-year-old children enrolled in the day care program at the Catholic Charities, Model Cities Center to attend a performance by the Little Theatre of the Deaf in December. The GCRC donated the money for the tickets for 20 children, two classroom teachers and two Gallaudet students—Sue McDevitt and Diana Lockhart—who were assisting in the five-year-old classroom at the Center.

Joyce Koelling, education coordinator for the day care program, reported that the event was quite a success. The group went to the Smithsonian where the Little Theatre of the Deaf was performing for Discovery Theater. Koelling also commented on the contributions of the Gallaudet students. "I have been particularly pleased for the children to have the experience of working and communicating with deaf persons," she said.

The Catholic Charities, Model Cities Center, which provides day care for young children of low income families, is a neighbor of Gallaudet located on Neal Street, NE. One of the major roles of the GCRC is helping Gallaudet to be a good neighbor.

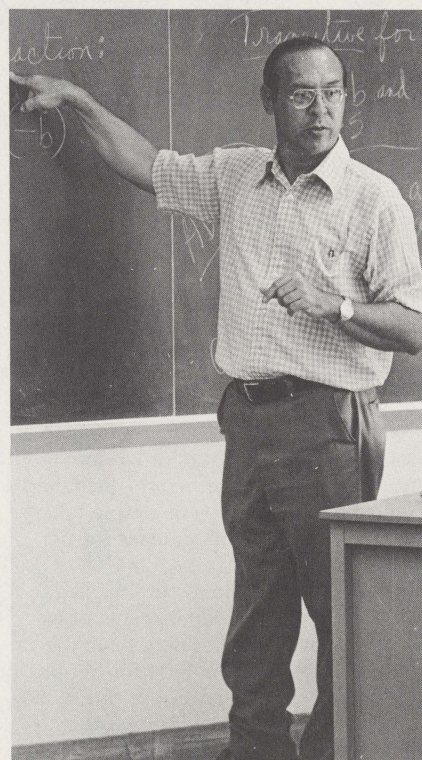

Dianne Brooks, assistant professor with the Department of Counseling, is assuming the directorship of the Department of Psychological Services for the National Technical Institute for the Deaf at Rochester Institute of Technology this month.

President Edward C. Merrill, Jr. and Gil Delgado, assistant vice president of Academic Affairs and dean of the Graduate School, attended an honorary degree ceremony at Georgetown University honoring the president of Costa Rica, Rodriguez Carazo, this past December.

Dean Delgado and Vice President for MSSD/KDES Bob Davila, along with Silvia Golocovsky, a Primary instructor at Kendall, were invited to assess the St. Gabriel School for Deaf Children in San Juan, Puerto Rico, Dec. 10-12. They met with students, faculty, deaf adults and other professionals. Several possible collaborative projects surfaced during the meeting, and a final report will be sent by the end of January.

Gil Delgado has been appointed to represent the Council of Graduate Schools on the Higher Education and the Handicapped Project. This project is funded through the American Council on Education by the Office of Special Education and Rehabilitation Services. Delgado attended the Council of Graduate Schools national meeting and made a presentation.

Sue Ellis, External Affairs officer with the President's Office, traveled to Toronto, Canada the week of Jan. 19 to attend the Middle Atlantic District 2 conference of the Council for the Advancement and Support of Education. Ellis has been serving as program chairperson of the conference's Government Relations Program and was responsible for planning the content and securing participants for eight different panels on government relations issues.

Raymond Kolander is an assistant professor of mathematics.

A lot of printed material as well as useful information was available at the "Drugs in Perspective" workshop sponsored by the Counseling and Placement Center Jan. 5-7. Conducted by Domingos Lobo of the Department of Human Services, and Gallaudet counselor Vera Follain-Grisell, the workshop was held to familiarize participants with drugs and alcohol. Participants were representatives from Safety and Security, Student Life and the Infirmary, as well as all the counselors with the Counseling and Placement Center.

Academy to host political workshop

The National Academy of Gallaudet College is hosting a workshop on "New Challenges in Deaf Education: Understanding the Political Process" at KDES this Friday and Saturday, Jan. 23-24.

Cosponsors include CAID/CEASD, A.G. Bell Association, IAPD, NAD, and Gallaudet College through Pre-College Programs, the Kellogg Special Schools project and the Extension Centers at Johnson County and Northern Essex Community Colleges. Dr. Martin LaVoor, former senior legislative associate for the U.S. House Subcommittee on Elementary, Secondary and Vocational Education, will serve as the key faculty for the workshop.

A primary focus of the workshop will be to develop the political and legislative skills necessary for working on public

policy issues. Similar workshops were also held last November in Lawrence, MA and December at Johnson County Community College in Overland Park, KS.

Up to 100 educators, administrators, parents and consumers will convene for a two day political simulation exercise, using Title I of the Elementary and Secondary Education Act as the content focus. Participants will be "Senators," "Congresspersons" and lobbyists during the proceedings to help them acquire skills in legislative activity and advocacy.

Staff, students and faculty are welcome to attend. Registration is \$20 and includes materials plus coffee and Danish both mornings. To register, contact Susan Mermon at x5480.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities. The deadline is followed by an abbreviation of the federal agency and the program title. For more details call Glenn Pfau, Office of Sponsored Research, x5030 (Voice or TDD).

Deadline	Program
01/23/81	OSE—Youth Employment Research
01/23/81	OSE—Minority Handicapped Research
01/27/81	ED/NIE—Teaching and Learning Research
01/27/81	ED—Women's Educational Equity Act Program
01/30/81	OSE—Regional Education Programs for Deaf & Other Handicapped
01/31/81	NSF—Public Understanding of Science
02/06/81	OSE—Field Initiated Research
02/15/81	NEH—Research Conferences
02/18/81	OSE—Handicapped Early Childhood Assistance (model projects)
02/18/81	OSE—Handicapped Media Services and Captioned Films

03/01/81	NEH—Consultant Grants for Higher Education
03/14/81	OSE—Special Projects for Severely Disabled Individuals

Weekly program highlight

The Office of Special Education within the Department of Education sponsors a number of programs which promote research on the education of handicapped individuals. One such program, "Student Initiated Research," offers support to students at the undergraduate, masters or doctoral level for research projects concerning educational programs for the handicapped. Funds are available for travel, materials, data collection and synthesis, equipment and justifiable consultant fees. More than 90% of all successful applications have been submitted by masters or doctoral candidates.

The Department of Education requires that a faculty or staff member at the applicant's institution be listed as principal investigator even though the student will be directing the project. There is \$250,000 available for Student Initiated Research Projects in FY 1981. The maximum size grant is \$10,000 and ED expects to award roughly 30 new grants this year. Deadline is March 17, 1981. More information on this program may be obtained from the Office of Sponsored Research.

International Year of Disabled Persons

1981 has been designated the International Year of Disabled Persons by the United Nations to draw worldwide attention to persons with physical, mental, sensory or emotional impairments. As the IYDP begins, more than 1,400 communities, the governors of all 50 states and 280 national organizations are working with the U.S. Council for IYDP in developing programs.

The U.S. Council is a nonprofit organization formed to promote the Year in this country. Gallaudet President Edward C. Merrill, Jr. is a member of the U.S. Council Board of Directors.

Gallaudet's Institutional Advancement Team has developed a number of projects to promote Gallaudet's involvement in the International Year of Disabled Persons, and people on campus will be implementing them during the year.

In the areas of outreach and national visibility, plans include:

- Developing a fact sheet jointly with the National Association of the Deaf to send to all state and community liaison persons so they will have information about deafness and Gallaudet.
- Providing state and community liaison persons with a list of programs or activities which Gallaudet can provide during IYDP in their locales.
- Trying to get Gallaudet people on TV talk shows.

- Trying to get Gallaudet's president on major programs with professional associations to talk about accessibility to higher education for handicapped people.
- Planning an IYDP Day when all Gallaudet College Alumni Association chapters across the country will hold an IYDP program.
- For the campus and Washington higher education community, plans include:
 - Holding a major convocation with a disabled person as a speaker and awarding honorary degrees to exceptional people as well as awarding a Powrie V. Doctor medallion.
 - Working to get displays on deafness and IYDP in local libraries.
 - Inviting a deaf speaker for Commencement.
 - Tying the opening of the Learning

Center into IYDP, perhaps by holding a series of seminars featuring handicapped speakers talking about their areas of expertise.

Programs being planned across the nation during the year will be designed to encourage widespread citizen participation, according to U.S. Council President Alan A. Reich. He identified the expansion of opportunities in education and employment; greater social, cultural and recreational participation; access to housing, buildings and transportation; and accident and disease prevention as areas in which further progress must be made.

There are 35 million Americans with physical or mental disabilities and, together with their family members, more than 89 million Americans are directly affected by disability.

In proclaiming 1981 as the International Year of Disabled Persons, the United Nations chose as the theme, "full participation of disabled persons in the life of their societies." The U.S. Council was formed in 1979 to promote the observance in the United States. Both Presidents Carter and Reagan have pledged their cooperation and full support to the Year and to the U.S. Council.

Individuals interested in participating can contact Bill Apple, Gallaudet's coordinator for IYDP, in the President's Office, x5075.

Honors Program

Continued from page 1

of other departments have such programs under consideration.

Course offerings in the College Honors Program include separate Honors sections of existing courses, Honors options within the regular classroom setting (by meeting additional requirements in a course) and new courses designed for the program. In this last category will be the Honors Seminars. These seminars will deal with topics of general interest from a variety of perspectives and will attempt to demonstrate the interdependence of academic disciplines while requiring students to do in-depth study of some particular aspect of the topic. Seminar topics anticipated for the '81-'82 year are "Death and Dying" taught by Dick Meisegeier in the fall, and "Futurism" taught by Nancy Kensicki in the spring.

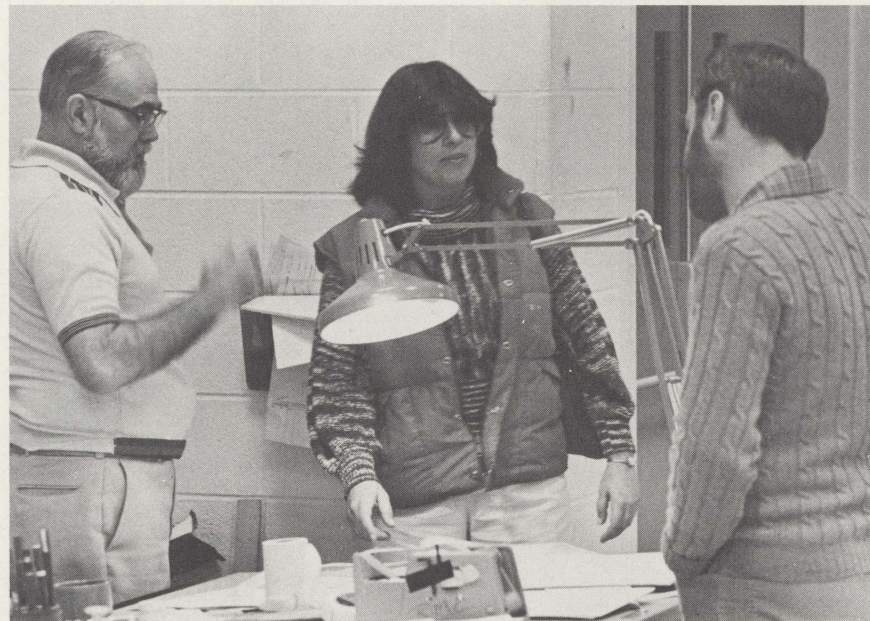

Additional offerings in the Honors Program in fall and spring of 1981-82 are anticipated to be introductory level courses in biology, American history, logic, English, French, sociology, communication arts, English words from Latin and English words from Greek. Honors options will also be available in an undetermined number of courses, including Sociology 307 and possibly second year French.

The Honors Program is administered by Director Catherine Ingold and an Honors Council appointed by the vice president for Academic Affairs. Current members of the council are Professors John Christiansen, Carol Garretson, Dorothy Hamberg and Jane Reehl, and student members Mary Cordano and Janet Gemmill.

To learn more about the program, contact the Honors office, HMB 171, x5771 voice or TDD.

Library gets TDD

Aspen Hill Library in Montgomery County has a new TDD number. It is 871-1570.

Artist Richard Chiarizia, left, discusses an Outreach project with Outreach planning specialists Jo Israelson and Tom Wallwork.

Gallaudet College is an equal opportunity employer-educational institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

ASHA presents service awards

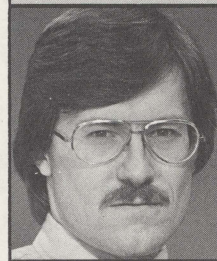

John E.D. Ball, president of the National Captioning Institute, was presented the Distinguished Service Award recently by the American Speech-Language-Hearing Association in recognition of his service to the hearing handicapped.

Other recipients of the DSA were Senator Richard Schweiker, cited for his legislation for the handicapped and Patria Forsythe, staff director of the Senate Subcommittee on the Handicapped who was honored for her pursuit of legislative and statutory rights for communicatively handicapped persons.

The awards were presented at the ASHA's annual convention held in Detroit. The Distinguished Service Awards are presented annually to persons who help promote the goals of the profession of speech-language pathology and audiology.

Personalities

Dan Bryant, formerly manager of Contracts and Operations Services at Gallaudet, has been promoted to director of Business Services, replacing Kevin Berk, who has moved to Phoenix, AZ. Bryant has a BS from Juniata College in Huntingdon, PA and attended the graduate program at George Mason University. He is presently working on a graduate degree at the University of Maryland. Bryant joined the Purchasing Department in 1974 as a junior buyer, was promoted to senior buyer a year later, and in 1978 became project manager of the new Kendall School. When that project was completed he became manager of Contracts and Operations.

Bryant

Hibbert

Pierre H. (Pete) Hibbert is a cable tv system operator with College Educational Resources. He has served as a library technician, Media at Gallaudet since January, 1980. Prior to that, he managed stores and restaurants, administered a USO touring show program for the U.S. Army in Europe and worked as an audio/visual technician for various companies. Hibbert attended American University, Georgetown University, Montgomery College and Angelo State University and is currently studying television production at the University of Maryland.

Thomas

Cinelli

Marjorie Thomas is a cataloger with Technical Services for the Gallaudet College Library. She previously worked as a cataloger with the Department of the Interior and as a cataloger-reference librarian with the Office of Personnel Management. She has her MLS from the University of Hawaii.

Patricia Cinelli is a Pre-College writer with the Alumni/Public Relations Office, writing articles for various campus publications. She has her BS in journalism from the Boston University School of Public Communication. Before coming to Gallaudet, Cinelli was a newperson for Associated Press in Honolulu, Hawaii and an on-camera news reporter/producer for an ABC affiliate in Honolulu.

Folger plays

The Folger Theatre Group is presenting interpreted performances for its fourth consecutive season.

This year's interpreted performance schedule is:

- *The Rivals* by Richard Brinsley Sheridan, Jan. 22, 8 p.m., Folger Theatre.
- *New Play*, Feb. 26, 8 p.m., Folger Theatre.
- *Love's Labour's Lost* by William Shakespeare, April 16, 8 p.m., Folger Theatre.
- *New Play*, June 11, 7:30 p.m., Kennedy Center/Terrace Theatre.
- *Romeo and Juliet* by William Shakespeare, July 23, 8 p.m., Folger Theatre.
- or
- *Julius Caesar* by William Shakespeare, July 23, 8 p.m., Folger Theatre.

Tickets for performances at the Folger Theatre can be reserved by calling 546-4000. Tickets for performances at the Terrace Theatre can be reserved by calling Instant Charge at 857-0900.

Barbara Brauer, a research scientist with Research Tests/Measurements, talks with Richard Celeste, head of the Peace Corps, on the new TDD recently installed by the Peace Corps. Looking on is Eli Savanick, acting director of the International Center on Deafness. The new TDD number for nationwide information on the Peace Corps is (202) 254-5851 or 254-5657 and can be called toll-free. Brauer and Savanick traveled to the Philippines last week to meet and consult with Peace Corps volunteers working in deaf education. The International Center this past year recruited and trained volunteers for the two-year Peace Corps assignment in the Philippines working with deaf people.

More on campus lighting

by Jim Hull

Energy conservation, born of necessity by dwindling supplies and interruptions in transport, sometimes takes devious and subtle forms. Further compounding the necessity for conservation is the rapidly rising cost of fuel itself and, in turn, electric power.

What makes power expensive? Three things: fuel, labor and facilities. The facilities are built, and PEPCO does not see a need for additional facilities for another decade. The labor required is already there and in the system. This leaves fuel as the large variable.

Approximately 11,000 BTU's of fuel are required to produce and deliver one kilowatt of power which has a heat value of about 3,413 BTU's. The difference is lost forever in generating and transmitting—from the steam boiler to the familiar meter. You pay, and the College pays, for the kilowatt hour rate charged at the meter.

Gallaudet College in October 1980 consumed 19% more power than in the corresponding month in 1979. Further, the cost jumped 37%. True, we have more floor space, but it does not compensate for the difference between consumption and cost.

A part of total consumption goes into lighting. Here we have been and will be doing further work in reducing the amount of light where it is above recommended intensities, and generally improving vision in so doing. This activity takes three forms: control, conversion and reduction.

Control: A casual visitor to the Central Utilities Building Conference Room will not detect it, but the light diffusing panels in the ceiling are polarized. These panels act the same way as polarized sunglasses do to reduce glare. Because of the polarized panels, more than half of the 40 watt lamps were removed, intensity was reduced from 180 foot candles to 70 and printed matter and handwriting can be seen clearer than before. An added bonus of these panels is that installation has apparently eliminated headaches caused by poor lighting. Another control used on campus is a "Batwing" diffuser for fluorescent panels, which has the effect of spreading light more horizontally than the standard prismatic panel.

zontally than the standard prismatic panel.

Conversion: Various conversion lighting fixtures have been tested. One is a fixture having two six watt fluorescent lamps replacing an incandescent fixture of 60 watts in the stairwells. Amazingly, the building is getting three to four additional foot candles of illumination from these fixtures while reducing wattage by 75%.

Have you noticed something different in the hanging globe fixtures in the Fine Arts Building? These fixtures now contain 15 watt fluorescent lamps instead of incandescent lamps. Another area being considered for conversion from four 60 watt incandescent lamps to a 54 watt fluorescent is the non-dimming round fixtures around the main staircase in the College dining area. Other areas for possible conversion include all the incandescent lamps in the College restrooms, and as many other areas as possible within available funding.

Reduction: Most structures designed prior to the oil embargo had over-designed lighting levels. Engineers are rethinking illumination, and the end result has been a downward revision in the illumination level we really need. Selective reduction is possible. Reduction in a two-tube or four-tube fluorescent fixture takes the form of a "Phantom Tube" that looks like a standard tube but is really a long resistor protecting the ballast in a fixture. It does not produce light but in effect saves costly replacement or rewiring of the fixture. One of the prime areas being considered for this is the MSSD Educational Building where there are 18 tubes in a single fixture.

A number of other items are also being considered. For instance, a five minute timer has been installed in a custodial closet to limit the burning time. Two trial ultrasonic devices are being installed to control lighting in a classroom; they will turn lights on when there is movement in the room and turn them off at a selected time after movement stops. There is also a heat sensing device that will produce the same results. One of the most sophisticated devices will selectively dim the lighting in a room according to the intensity of the natural light outside the windows.

Tom Bowen is an electronic technician with Technical Support.

Security has new phone numbers

The Department of Safety and Security is upgrading its communications capabilities. As part of this process, the campus police have designated emergency and non-emergency telephone lines.

From now on, all requests for emergency services (police, fire, ambulance) should be made to the campus police at x5555 voice or x5666 TDD.

Requests for information and for non-emergencies (parking and traffic information, vehicle registration, identification cards, access to buildings, etc.) should be made to the Department of Safety and Security at x5563 for both voice and TDD calls.

The campus police advise all faculty, staff and students to keep the emergency numbers readily available at all times.

Rehab congress set

Rehabilitation '81, International Congress and Exhibition "Aids for the Disabled," will be held June 18-24, 1981 in Dusseldorf, West Germany. It is being sponsored by the German Association for the Rehabilitation of the Handicapped and Rehabilitation International.

Gallaudet will not be sending an official delegation but encourages anyone interested to consider going at his or her own expense. For information and addresses on hotels, tours and the Congress, contact the International Center on Deafness at x5316.
